

## Creating civic pride through design and furnishings

**Corona City Hall Requirements:** Focusing on public amenities, the new Corona City Hall needed to be a unifying complement to the array of community services in the district. The City of Corona wanted to create a strong civic identity which would appeal to potential new businesses as well as every Corona citizen.

**IOS Solutions:** Interior Office Solutions teamed up with the City of Corona Public Works Department to provide innovative solutions to meet the city's aesthetic, budgetary and functionality needs. Interior Office Solutions worked closely with over fifteen different departments of the city to perform detailed design programming and furniture consulting services for each department. The design, programming, procurement and installation of the furniture for the new 134,000 sq. ft. city hall was a process that took over 18 months. The City of Corona was very pleased with the results of their new City Hall. It has become a great source of pride for the city.
