

Building a stable, honest and fresh image through interior furnishings and design

Northwestern Mutual Financial Network Requirements:

When Northwestern Mutual Financial Network was looking to relocate its downtown Los Angeles offices, the team wanted their space to reflect the stability and integrity that is fundamental to their role as financial advisors. At the same time, they needed a fresh environment to attract a talented workforce of young recruits.

IOS Solutions: Understanding these cultural needs as well as the practical aspects of the project, Wirt Design Group responded with a clean, contemporary design to simultaneously represent the company's solid foundation and their bright future. A logical floor plan maximized efficiency, creating elegant public zones for conferences, meetings and private hubs to support the firm's team-based organizational structure. NMFN and Wirt Design chose to work with Interior Office Solutions to provide 130 workstations, 50 private offices, over 200 Haworth Zody chairs and a mix of conference room, lobby and other ancillary furniture. Interior Office Solutions furnished all the product in the new, two-floor, 45,000 sq. ft. Los Angeles office. The fast-paced project was completed on-time and to the client's satisfaction. Since Northwestern Mutual Financial Network has moved into their new space, they have had more success recruiting than ever before.
