

Moving away from the traditional work station with individualized work areas and open spaces

Oversee.net Requirements: Oversee.net is an online solution for publishers, advertisers and consumers. In designing their new space, it was important to be able to accommodate their technology requirements as well as provide their employees with an open work environment that was flexible, creative and could be tailored to the individual.

IOS Solutions: The project team of Felderman Keatinge & Associates and Interior Office Solutions suggested the Haworth "Race" system for its off-modularity and its unsurpassed technological capabilities. Oversee.net wanted to get away from the enclosed feel of the traditional panel system but also wanted to provide their employees with individual space and privacy. Using the Race System with 3Form™ panels provided privacy but also created the open work environment that the company wanted to achieve. Also, the off-modular work surfaces allowed for quick and easy reconfiguration, which allowed each employee the ability to select and individualize their workstations.

PROJECT SPECIFICS:

- 55,000 sq ft.
- 160 Haworth Race workstations
- 7 Haworth Race private offices
- Haworth X Series lateral files
- Haworth Zody task seating

OVERSEE.NET AT A GLANCE:

Oversee.net has over 150 employees who work to deliver innovative online marketing solutions every day. Headquartered in Los Angeles, Oversee.net is an industry leader, and has grown organically since its inception. By using knowledge of internet traffic and developing proprietary technology that focuses on optimized utilization of the Internet, they have achieved leadership positions in three core areas: direct navigation, lead generation and online advertising solutions.
